Re: The Annual Report of The Arthur and Sonia Labatt Brain Tumour Research Centre, 2021-22

Dear Kim,

With this letter, I am pleased to share our most recent Annual Report from the Arthur and Sonia Labatt Brain Tumour Research Centre. From its contents, you will appreciate the progress we have made in the past year. All of this despite our having to work within the confines of the COVID-19 pandemic, and the restrictions that were faced by all researchers and trainees within the laboratories at SickKids.

Thankfully, the pandemic is in our rearview mirror, and we are continuing to move forward on so many different fronts related to our greater understanding of and treatment for pediatric brain tumours. We remain the largest brain tumour research centre of its kind devoted to pediatric brain tumour research.

None of our successes would be possible without your very great and generous support which has enabled us to remain on the cutting edge of research and translational care. For this, I thank you sincerely for all of you have done and continue to do for us.

With best wishes,

James T Rutka, OC, O Ont, MD, PhD, FRCSC, FACS, FAANS
JTR/ac

*Kim,
Nice to see you at
meagan's hug!
Thanks for all your*

*Support,
Jim*
